

◆ PROFILE

Registered Architect (M.A.) and member of the Bayerische Architektenkammer with approximately seven years of professional experience in **design, permit and execution planning** for residential, commercial and mixed-use building projects.

Independent delivery of **HOAI service phases 1-5**: needs analysis and basic evaluation with the client, development and presentation of the architectural design, permit documentation, and execution and detail planning.

Consistently **BIM-based planning with Autodesk Revit** across all project phases, including model coordination with structural and MEP engineering as well as liaison with authorities and contractors.

Structured, quality- and results-oriented working style with strong client focus. Based in the Regensburg area.

◆ CORE COMPETENCIES BY SERVICE PHASE

Basic Evaluation & Preliminary Design

HOAI LP 1-2

Needs analysis and basic evaluation with clients · Site and feasibility studies · Development of design options as a decision basis

Design & Permit Planning

HOAI LP 3-4

Translation of client requirements into the architectural design · Design presentation to the client · Building permit and approval documentation · Coordination with authorities

Execution Planning

HOAI LP 5

Execution and detail planning · Working drawings to construction readiness · Building specifications and technical documentation

BIM & CAD

METHODOLOGY

Autodesk Revit: model setup, component families, model-based drawing production, model coordination · AutoCAD · IFC data exchange · BIM-based consultant coordination

Coordination

INTERFACES

Structural, HVAC/plumbing and electrical engineers · Clients and users · Authorities · Contractors

Quality Assurance

DELIVERY

Site inspections · Reconciliation of planning and execution · Safeguarding the design intent through to completion

◆ PROFESSIONAL EXPERIENCE

**Freelance Architect — Own Practice**

2021 — PRESENT

Lebanon · project-based

- Independent delivery of seven completed projects across service phases 1-5 — from needs analysis through to complete execution planning
- Development of the architectural design from client requirements, including presentation and iterative coordination through to approval
- Preparation of permit documentation and coordination with the relevant authorities
- Setup and maintenance of coordinated Revit models across all planning phases, with model-based drawing production
- Technical coordination of structural, HVAC and electrical engineering into a fully integrated design
- Execution and detail planning, site support and quality assurance through to completion

Project types: Residential (single-family houses / villas) · Interior fit-out · Landscape design · Execution planning packages

◆ PROFESSIONAL EXPERIENCE — CONTINUED

● Architect — SFArchitects

10/2019 — 10/2021

Beirut, Lebanon

- Design and execution planning for residential, commercial and mixed-use building projects
- Site analyses and feasibility studies as a basis for design and investment decisions
- Preparation of floor plans, elevations, sections and presentation material for client meetings
- Contribution to building permit applications and regulatory approval processes
- Coordination with specialist engineers to integrate technical requirements into the planning documents
- Site inspections, monitoring of construction progress, and contribution to building specifications and scheduling

● Internships in Architecture and Construction

2016 — 2018

Beirut and Bekaa, Lebanon

- **Prime Construction / Bitar Construction**, Beirut (2018) — Contribution to design development and execution documentation; support to project teams in planning coordination and site activities
- **Office of Dr. Ali Hassan**, Bekaa (2017) — Work on residential projects and production of technical drawings
- **Municipal Office**, Beirut (2016) — Support for municipal planning and building review activities

◆ EDUCATION

Master of Arts — Architecture

Lebanese University, Beirut · 2017 – 2019

Bachelor of Arts — Architecture

Lebanese University, Beirut · 2014 – 2017

◆ PROFESSIONAL RECOGNITION & MEMBERSHIPS

Bayerische Architektenkammer

Registered Architect, Germany

German professional recognition completed

Order of Engineers and Architects

Beirut, Lebanon — registered member

◆ SOFTWARE

Autodesk Revit	advanced	Adobe InDesign / Photoshop / Illustrator	proficient
AutoCAD	advanced	Lumion (visualisation)	proficient
MS Office (Word, Excel, PowerPoint)	advanced	IFC exchange / model coordination	proficient
SketchUp	advanced		

◆ LANGUAGES

Arabic	native	French	professional working
English	professional working	German	B1 (certified)

◆ CONTINUING DEVELOPMENT & GERMAN PLANNING CONTEXT

- Intensive self-directed study of the HOAI and its service phases, together with German building submission, documentation and execution standards
- Ongoing development in BIM methodology and Revit-based collaborative workflows
- German language course in progress, targeting level B2
